MBSData, LLC Now Available on 1010data Analytics Platform

1010data Brings MBSData to Small and Mid-Sized Investors

ASF 2010, WASHINGTON, D.C. – February 1, 2010 – 1010data, providers of the hosted analytics and the reporting platform of choice for mortgage and asset-backed securities research and trading, announced today a new data source for their namesake platform. 1010data is now hosting MBSData, LLC, which provides accurate and timely deal and loan level information on public non-agency mortgage-backed securities.

"MBSData recognizes the market need for bringing value and full transparency to small and mid-sized buy side investors who have been priced out of the market when trying to obtain detailed MBS deal and loan level information," said Thomas DeLorenzo, Managing Partner, MBSData, LLC. "Partnering with a market leader like 1010data will greatly expand our ability to reach these customers."

Founded in 2009, MBSData helps customers analyze the risks associated with mortgage backed securities by presenting comprehensive multi-level views of the underlying collateral. MBSData has been accepted by the investment community not only for its customer first approach but for its fast monthly loan level processing cycle. MBSData clients have access to monthly loan level remittance information by the 1st day of each month.

"Offering MBSData on the 1010data platform gives investors access to data, performance metrics and analytics on over 98% of non-agency MBS deals," said Greg Munves, Vice President, 1010data. "We are committed to delivering value by giving our users a way to access and understand the data they need to make better decisions, and MBSData brings a robust and cost conscious option to the investment community."

About 1010data
1010data offers a data and analytics platform that is the only complete approach to performing the deepest analysis and getting the maximum insight directly from raw data, at a fraction of the cost and time of any other solution. 1010data's extensive history in business intelligence and data warehousing has enabled the company to create this powerful solution.
